

Introduction To Azure Storage-2

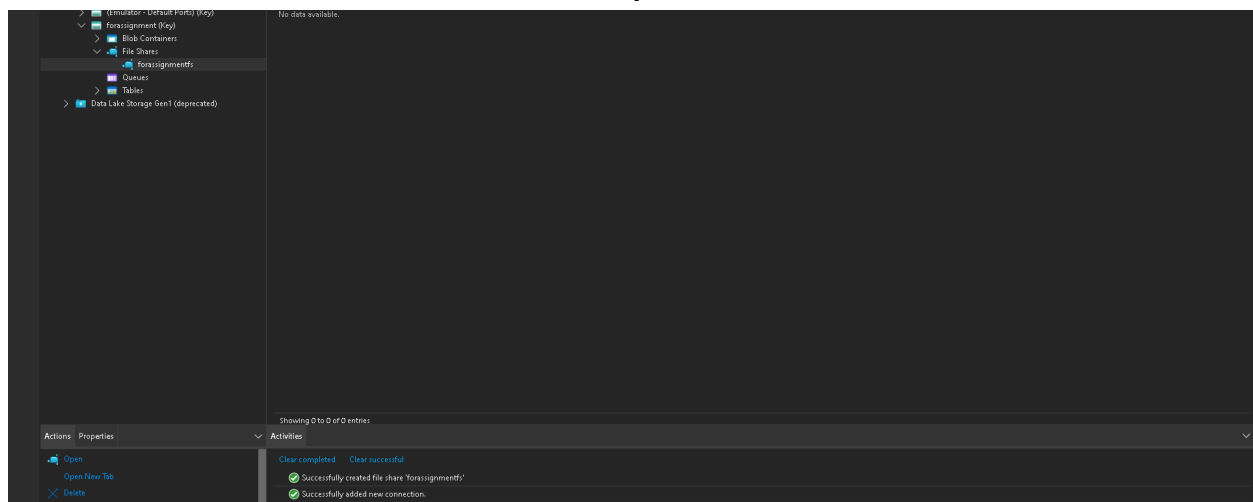

Do the following using the Storage explorer:

1. Create a Fileshare using the Storage explorer.
2. Upload files to the blob service.
3. Create an Azure Table and insert a record.

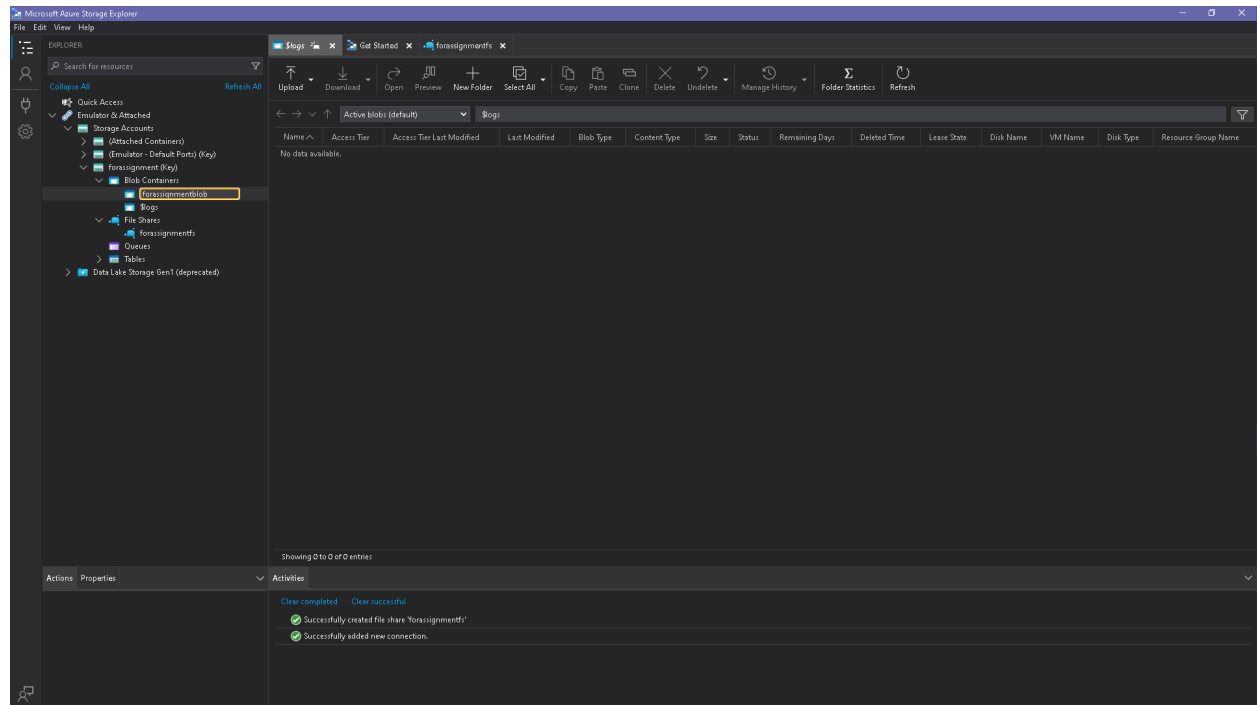

Open the storage explorer and click on File share under your storage account.
In the bottom left corner you will find the create fileshare option in properties.

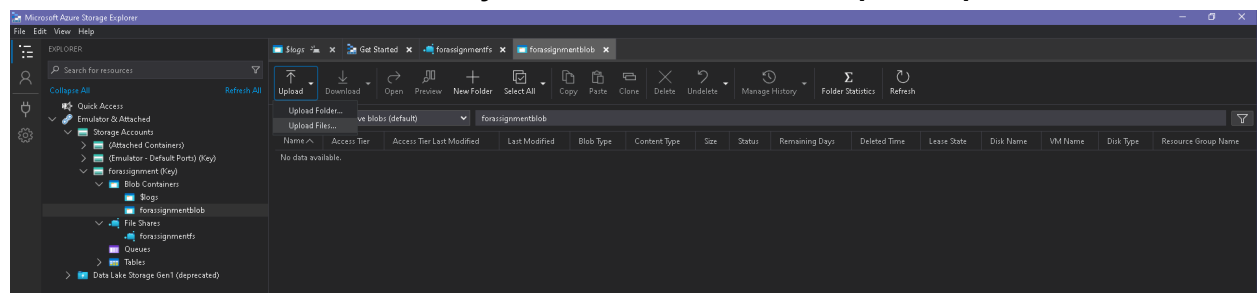

Name it and press enter.

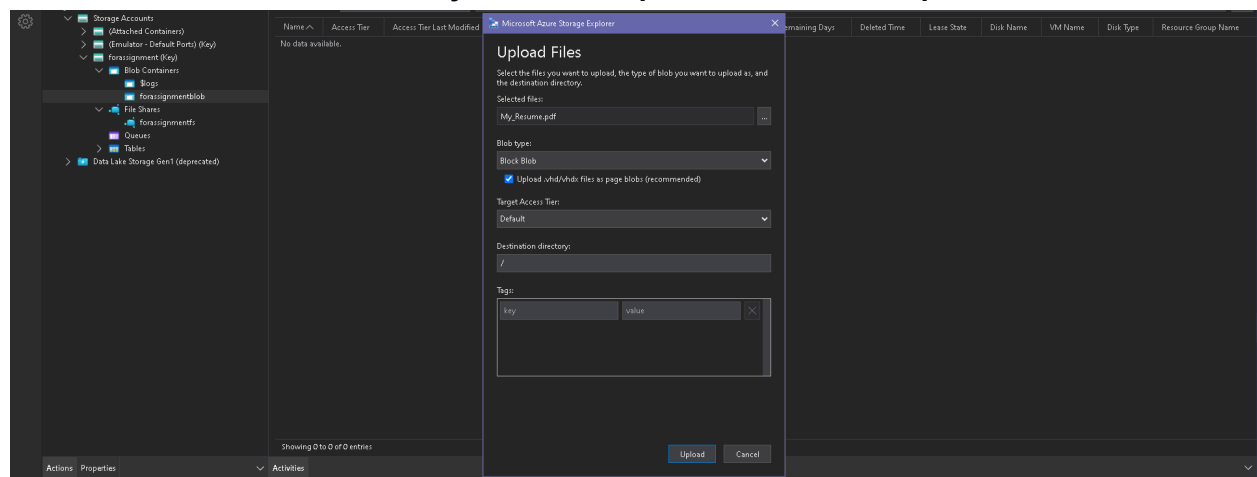

Now click on blob container and click on create option in bottom left corner. Name it and press enter.

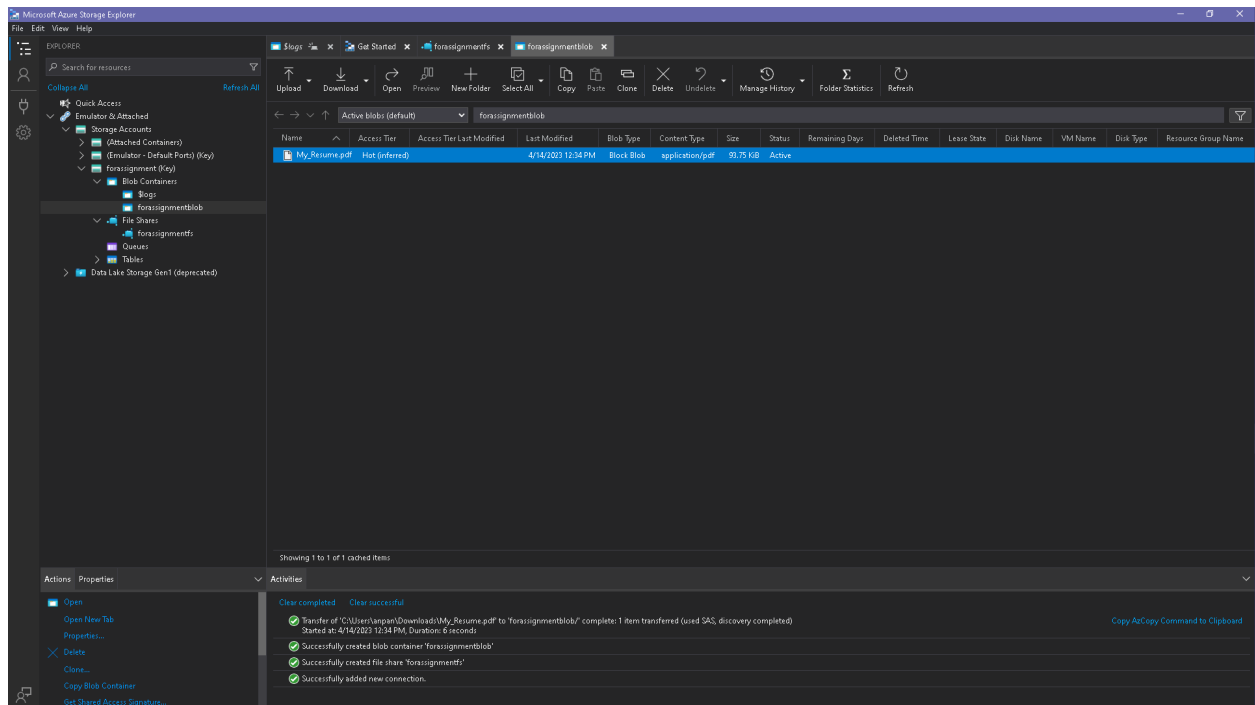

Click on container you created then click on upload option.

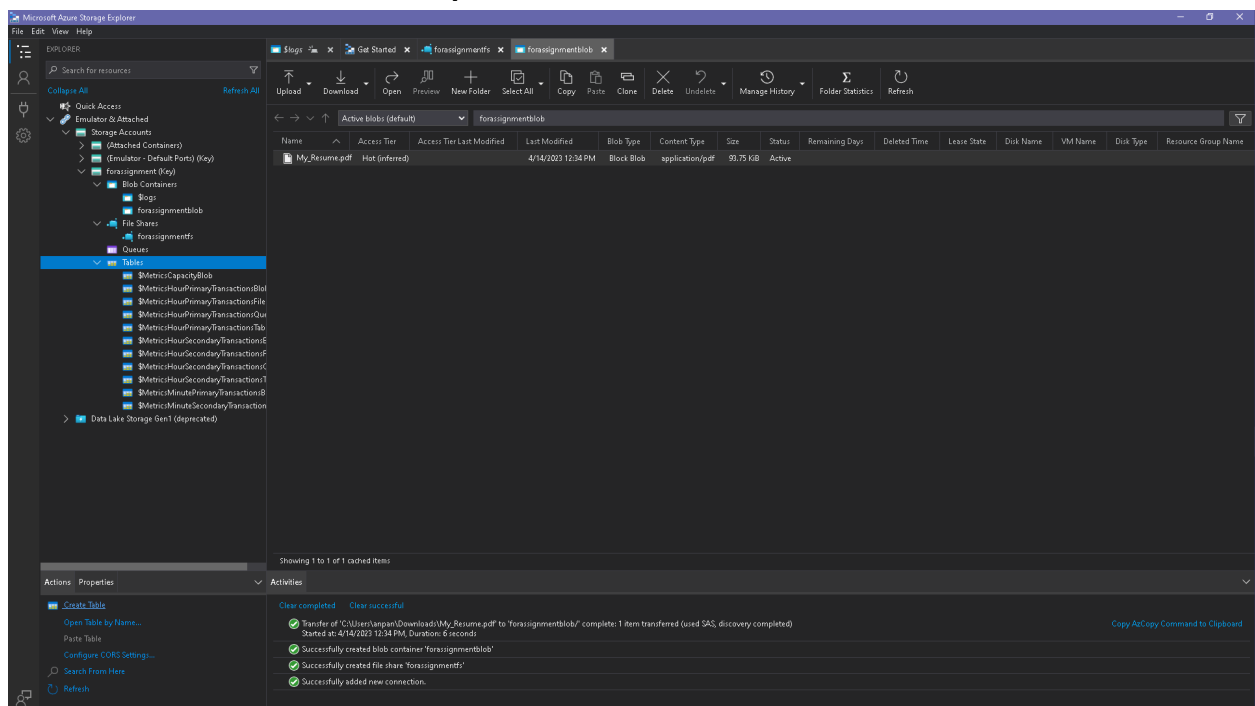

Select the file you want to upload and click on upload.

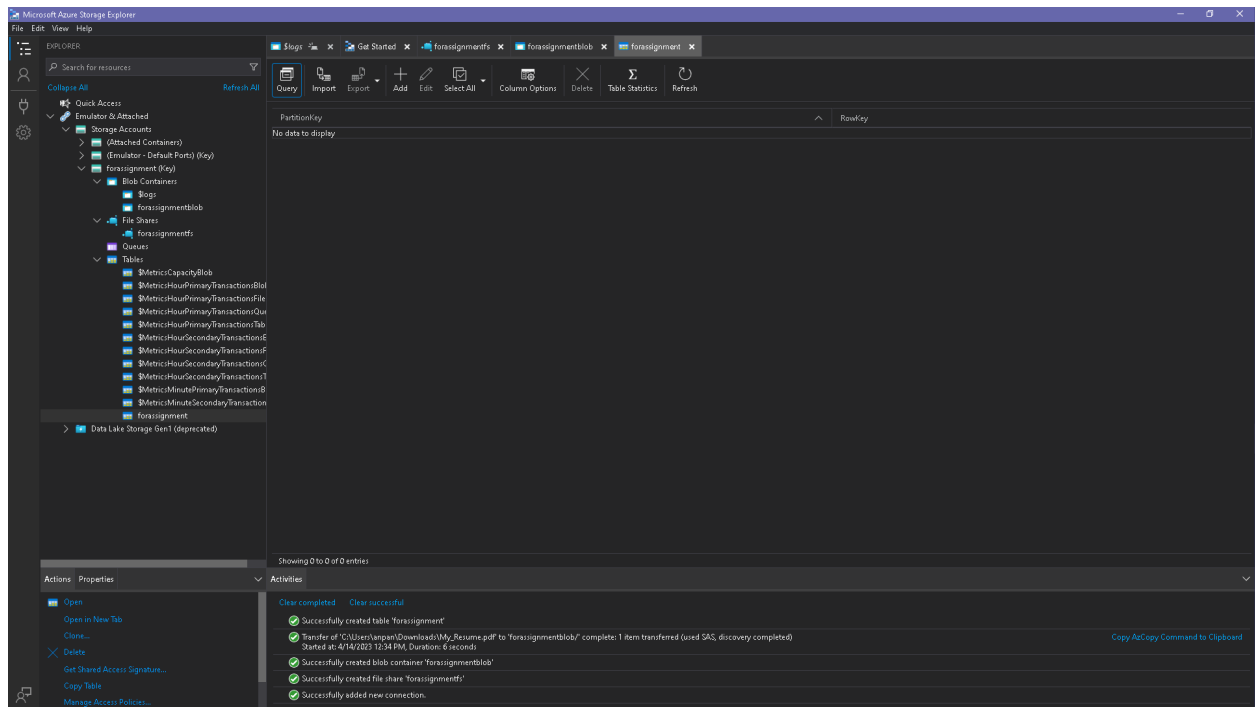

File has been uploaded.

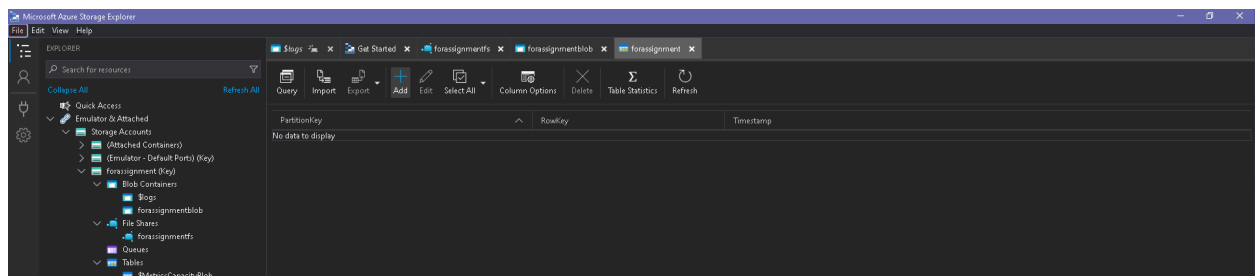

Now let us create a Table. Click on Table option under storage account. Click on create option in bottom left corner.

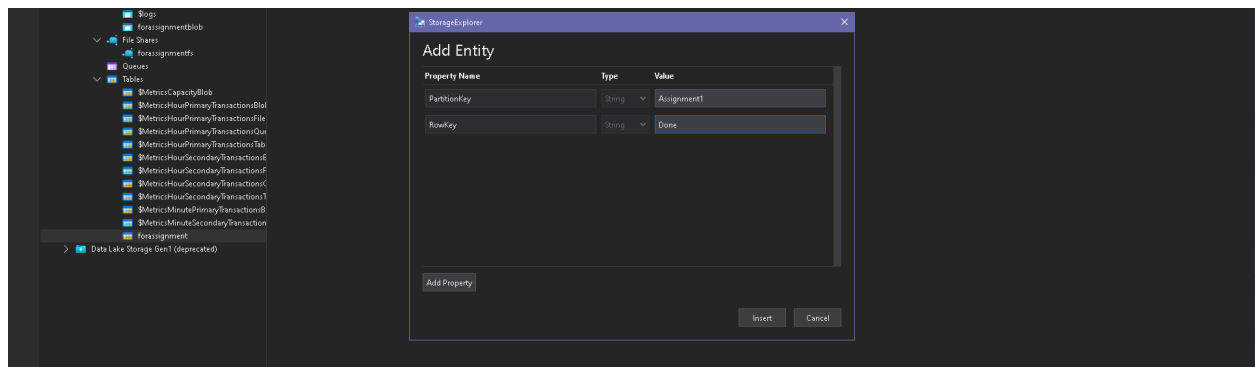

Name it and press enter.

To enter a record, click on + icon above.

Add the values to be recorded.

Record has been inserted.
